TERMS: Our terms are cash with order, or one-fourth cash with order and balance on receipt of order. If 30 or 60 day billing is desirable, we require at least 3 days notice before delivery is requested for credit investigation. Business references furnished by the client will expedite the handling of these accounts.

LANDSCAPE SERVICE: We offer the services of our landscape department for consultation and planting. Because of the rush of work during the early part of each planting season, we are sometimes unable to promise planting until advance orders are finished, usually by the middle of the season. However, if our planting department cannot execute an order at the time desired, we can usually recommend a reliable local landscaper to execute the plan. Ask for special quotations on all planting, whether of individual items or a total planting project.

GUARANTEES: We guarantee all plants from our nursery to be true to name and to be in good healthy condition when delivered. When our organization plants, we guarantee every plant to become established and begin growth. We do not **INSURE** plants over a period of time, since the perishability of plants and the care and weather conditions to which they are exposed are beyond our control.
